

PRESS RELEASE

GFT Solutions GmbH becomes GFT inboxx GmbH

GFT Solutions GmbH, a wholly-owned subsidiary of GFT Technologies AG, has been registered as GFT inboxx GmbH, with immediate effect. The renaming emphasises the successfully completed focussing of the company on the area of archiving.

GFT inboxx GmbH is a competence centre for archiving solutions. As a company-critical application, archiving must fulfil all compliance requirements.

This includes:

- email archiving for Microsoft Exchange, IBM Lotus Notes, Novell GroupWise and other messaging systems
- intelligent document management and file server archiving
- archiving of ERP data from SAP, Navision, Baan and other systems
- Archiving of accounting data in a way that can be audited (GDPdU conforming)

The employees of GFT inboxx GmbH have extensive know-how and longstanding experience with solutions for customers of any size. "Our goal is to establish GFT inboxx GmbH as the leading provider of email archiving in the upcoming months," explains Jürgen Obermann, CEO of the renamed GmbH. "We have the best conditions to accomplish this based on our experience, with already more than 1500 customers worldwide and a highly qualified team of employees."

By renaming the company, GFT inboxx GmbH is emphasising its leading position in the development of a new generation of archiving systems, which today have become an indispensable part of all business processes. As a provider that has specialised in these systems, GFT inboxx GmbH can tackle the requirements of the market in a flexible way and partake in the high growth rates. As a company focussed on software products, GFT inboxx GmbH has better opportunities for expanding the sales channels base and offering customers an extensive range of services.

In the future, the BPM activities of the former GFT Solutions GmbH will be continued in a separate company that concentrates specifically on that field. That way, it can concentrate specifically on the needs of the market and position inspire as a trendsetting platform for BPM even more successfully.

“This is just the beginning of tumultuous development in the archiving market. The volumes and the number of sources of electronic information will continue to grow very fast. Most products available today are limited to archiving emails, documents, and ERP data. We are working on a concept with which with all the remaining relevant company content can also be included in a comprehensive archiving solution,” concludes Obermann.

About GFT inboxx GmbH

As a leading European provider of solutions for email archiving, GFT inboxx GmbH combines extensive experience in the archiving sector with in-depth know-how of the regulatory requirements and compliance.

The former GFT Solutions GmbH had more than 20 years experience in the archiving sector and can already look back on more than 1500 successful installations worldwide. The company offers its customers a best-in-class service from the European development and service centre in Hamburg.

The company, with its headquarters in Hamburg, was founded in 1980 and is a wholly-owned subsidiary of GFT Technologies AG, an internationally leading IT service provider with sales of more than 230 million euro (estimate for 2007). Via the parent company, GFT inboxx GmbH has access to a worldwide network of locations and around 1200 IT experts.

The GFT Group share (WKN 580 050) is listed in the Prime Standard on the Frankfurt Stock Exchange and is a member of the GEX (German Entrepreneurial Index). You can find more on the GFT Group at www.gft.com.
